PROJECT DESCRIPTION

The I - 880 / Mission Boulevard Interchange provides a critical link between I-880 and major commercial areas on both sides of the freeway. This project improves traffic flow by separating local and regional traffic movement, providing compatibility with mainline widening and completing High Occupancy Vehicle (HOV) lanes to Santa Clara County. Phase 2A of the interchange reconstruction consisted of I-880 improvements and Route 262 improvements west of Kato Road.

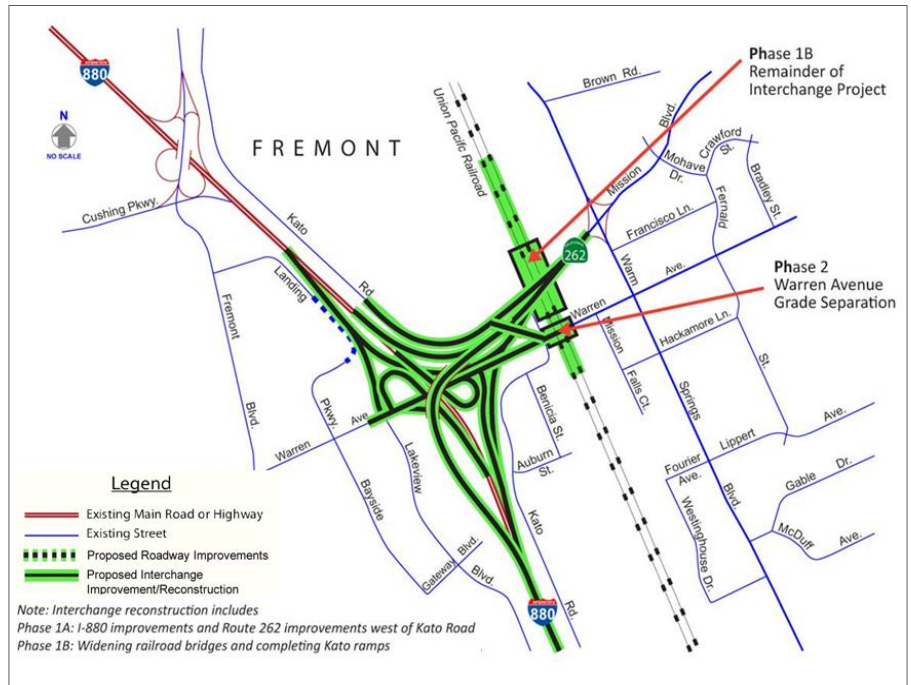

Phase 1B consists of the replacement of the UPRR bridges over Mission Boulevard (Route 262), widening Route 262 east of the Kato Road overcrossing and replacing the Kato Road ramps to Route 262. Phase 2 is the Warren Avenue / UPRR grade separation project.

PROJECT STATUS

Construction for Phase 1A was completed in June 2009. The Santa Clara Valley Transportation Authority (VTA) is leading the final design effort for Phase 1B/2 as it relates to their BART to San Jose Project. Construction on the Phase 1B/2 project is anticipated to begin summer 2012.
