PROJECT DESCRIPTION

This project proposes to construct operational and safety improvements on I-880 at the existing overcrossings of 23rd Avenue and 29th Avenue in the City of Oakland. Improvements include replacement of the freeway overcrossing structures, improvements to the northbound on and off ramps as well as the freeway mainline. The majority of the project is funded with \$73 million from the Trade Corridor Improvements Fund (TCIF) of the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006; approved by the voters as Proposition 1B in November 2006.

PROJECT STATUS

The final Project Report (PR) and Environmental Document (ED) were approved by Caltrans in April 2010. Final design, right-of-way (ROW) activities and utility relocation efforts are underway. 100% PS&E design documents were submitted to Caltrans for review in late April 2012. All ROW acquisition offers were made to affected property owners in December 2011. The project is scheduled for Ready To List (RTL) status in fall 2012; the California Transportation Commission (CTC) will then vote on the allocation of funds for construction of the project.
