

## PROJECT SPONSOR

City of Alameda  
City of Oakland

## PROJECT DESCRIPTION

The project includes development work to identify improvements between I-880, I-980 and local Oakland streets; including access to and from the Posey/Webster Tubes which connect Oakland and the island of Alameda. The improvements are intended to enhance or replace access to and from the freeways in the area of the existing Broadway and Jackson Street interchanges.

## PROJECT STATUS

The City of Alameda completed a Feasibility Study in April 2006 that evaluated concepts to provide improved direct access to I-880 from the Posey/Webster Tubes. The study recommended the preparation of a Caltrans Project Study Report (PSR) to further evaluate and refine a number of options; the PSR was approved by Caltrans in March 2011. The Alameda CTC intends to issue a Request for Proposals (RFP) to provide the professional services necessary to complete the Preliminary Engineering (PE) / Environmental Studies phase of the project.
