Alameda CTC

PROJECT DESCRIPTION

This project is a transportation planning study which will include various traffic and operational analyses and will document long and short range plans for State Highway improvements in the I-880, I-580 and SR 238 Corridors in Central Alameda County. The efforts will address the long-range plan and sequencing of improvements necessary to achieve traffic relief in the three corridors and will include development of a Local Alternative Transportation Improvement Program (LATIP).

PROJECT STATUS

Freeway operational analysis was completed in late 2007 and a prioritized LATIP was approved by the Policy Advisory Committee (PAC) in June 2008. The Cities of Hayward and San Leandro, the Alameda County Board of Supervisors, the Alameda County Transportation Authority (ACTA) and the Alameda County Congestion Management Agency (ACCMA) approved the prioritized list of projects and the LATIP in September 2009. The City of Hayward completed environmental clearance and approved the city's Land Use Study Environmental Impact Report (EIR) in July 2009. The California Transportation Committee (CTC) approved the SR 238 LATIP in May 2010 and approved the rescission of the SR 238 Hayward Bypass in June 2010. The Alameda CTC in collaboration with the PAC will begin Project Study Reports (PSR's) for projects in the approved LATIP.

Central Alameda County Freeway System Operational Analysis

Project Number: 508.0 | March 2012

Project Highlights

- The LATIP was presented to CTC in December 2009; approved in May 2010
- CTC approval of the rescission of SR 238 in downtown Hayward, June 2010
- The remaining 1986 Measure B funding, approximately \$3.2 million, will be used for project development of select projects on the approved LATIP
