

PROJECT SPONSOR

Alameda CTC

PROJECT DESCRIPTION

This project implemented the environmental mitigation measures defined by the resource agencies; included in the Environmental Document (ED) for the I-580 corridor improvement projects.

PROJECT STATUS

The approved ED for the I-580 Eastbound HOV Lane Project identified mitigation to replace the median planting with a landscape project outside the existing right of way. The Alameda CTC identified various locations within the cities of Pleasanton, Dublin and Livermore where replacement planting would take place; the various environmental mitigation projects have been completed.

In accordance with the Biological Opinion (BO) for the I-580 Westbound HOV Lane Project, environmental conservation easements to mitigate project impacts were purchased from Eagle Ridge Preserve. Eagle Ridge Preserve is responsible for constructing and maintaining the necessary mitigation work on the preserve property and for performing the necessary reporting. In addition, Alameda CTC has set up an endowment fund which will provide the necessary funding for the perpetual maintenance of the mitigation property.
