Alameda County: Central Hub of Bay Area Transit

Alameda County is one of California’s and the nation’s most transit-rich, multimodal environments — with the second highest transit mode share in the state. Public transit plays a vital role in Alameda County’s transportation network. Alameda County’s seven major transit operators carried 94 million passenger trips in 2017.

EMISSIONS REDUCTION

Transportation is the single largest contributor of emissions. Shifting the balance from single-driver cars to transit and other modes can help reduce emissions (both greenhouse gases and air pollutants) and enhance the quality of life and the environment in Alameda County.

ACCESS AND MOBILITY FOR EVERYONE

Transit provides access to work, school, medical appointments, and other important destinations. Widespread access to high quality transit service expands individual travel choice and helps meet growing travel demand.
Public Transit Providers Serving Alameda County

Seven transit agencies operate heavy rail, commuter rail, bus, ferry, and automated guideway services in Alameda County. Operational highlights from the fiscal year 2016-2017 appear below. Annual numbers reflect statistics for Alameda County only, unless otherwise noted.

**BART**
- 149,000 average weekday riders
- 43 million annual riders, 46% of annual countywide transit ridership
- 2nd largest transit provider in the Bay Area
- 995,000 hours of train car service
- 68% fare box recovery ratio*
- 22 of 48 stations are in Alameda County
- 103 of 245 route miles
- 662 rail cars*
- 38 years average fleet age*
- 89% on-time performance

**AC TRANSIT**
- 152,000 average weekday riders
- 47 million annual riders, 50% of countywide annual transit ridership
- 3rd largest transit provider in the Bay Area
- 1.7 million hours of bus service
- 17% fare box recovery ratio*
- 1,118 route miles on 151 routes
- 630 buses*
- 10.4 mph average bus speed
- 70% on-time performance*

**UNION CITY TRANSIT**
- 973 average weekday riders
- 280,000 total annual riders
- 37,500 hours of bus service
- 7% fare box recovery ratio
- 105 route miles on eight routes
- 95% on-time performance

**SF BAY FERRY**
- 8,300 weekday riders*
- 1.6 million annual riders
- 12,800 hours of ferry service
- 60% fare box recovery ratio*
- 12 ferries,* serving three terminals

**CAPITOL CORRIDOR**
- 1.6 million total annual riders*
- 5.1 million hours of train car service*
- 58% system operating ratio*
- 86 of 342 route miles
- 91% on-time performance*

**ACE**
- 461,000 total annual riders
- 1,755 average weekday riders
- 20,500 hours of train car service
- 41% fare box recovery ratio*
- 90 of 172 route miles
- 87% on-time performance*

**WHEELS (LAVTA)**
- 5,500 average weekday riders
- 1.5 million total annual riders
- 122,000 hours of bus service
- 14% fare box recovery ratio
- 300 route miles on 14 routes
- 81% on-time performance

* Systemwide.
Transit System Performance 2017

Over the last decade, total annual ridership in Alameda County had remained strong, primarily due to population growth. However, total ridership dipped slightly in 2016 for the first time since the end of the recession, before falling four percent in 2017.

Despite declines in annual boardings, transit ridership has remained strong in key markets – such as the transbay corridor.

Commuter transit markets have remained strong
While total annual ridership has fallen, commuter travel demand remains strong. AC Transit’s systemwide weekday boardings have been stable the last few years, while ridership on Transbay routes continues to grow. Ridership losses are largely on weekends and off-peak.

Service utilization decreased as costs increase
Both BART and AC Transit increased service in 2017 while ridership declined, significantly increasing the cost per boarding for both. BART’s operating expense per rider had generally improved since 2007, but increased 15 percent in 2017.
Alameda County’s transit operators are at a critical juncture. Inter-county services, especially in heavily congested and capacity-constrained parts of the system like the Transbay Corridor, have stayed competitive and attracted new riders. However, these systems are suffering from overcrowding. At the same time, local transit operators struggle to provide competitive service on increasingly congested roadways and are also faced with competition from a new range of on-demand mobility services.

**CHALLENGES**

**Speed, frequency, and reliability:** Many buses operate on congested roadways and struggle to stay on time and operate at competitive speeds.

**Poor transit system integration:** There are multiple transit systems in Alameda County, each with its own fare structure, ticketing system, and information, which can lead to confusion for passengers.

**High need for reinvestment in aging systems:** Even with the integration of the first new cars in 2017, BART has the oldest fleet of all major metropolitan transit providers in the United States. The average age of the fleet is 15 years older than the typical useful life of the trains. AC Transit stops and shelters are also old and declining in quality.

**Increasing competition from new mobility services:** The emergence of companies like Uber and Lyft appear to have coincided with declining transit ridership nationwide. These companies present both challenges as well as opportunities, particularly regarding first- and last-mile connections to transit.

**OPPORTUNITIES**

**Strong transit market in Alameda County:** Alameda County has many strong transit markets due to local land use patterns, demographics, and projected growth. Transit has a real potential to be a competitive choice over driving, with better performance relative to personal cars.

**Growing Transbay market:** Transit trips by bus, ferry, and BART between Alameda County and San Francisco have grown over the last decade. Transit demand is only expected to increase, so this represents an opportunity for strategic investment in Transbay operations to support growing ridership.

**New funding and opportunity for investment:** Investments that improve transit reliability, speed, and quality, especially on major travel corridors, will improve transit performance and competitiveness, making it a more attractive choice. This can help maintain current riders and attract new riders. New potential funding streams like Senate Bill 1 and Regional Measure 3 make more of these investments possible.

**System integration:** Clipper 2.0 presents an opportunity to create a seamless network, perhaps for the entire Bay Area. This integration is necessary to take full advantage of Alameda County’s rich transit network and diverse operators.
