

PROJECT SPONSOR

City of Hayward

PROJECT DESCRIPTION

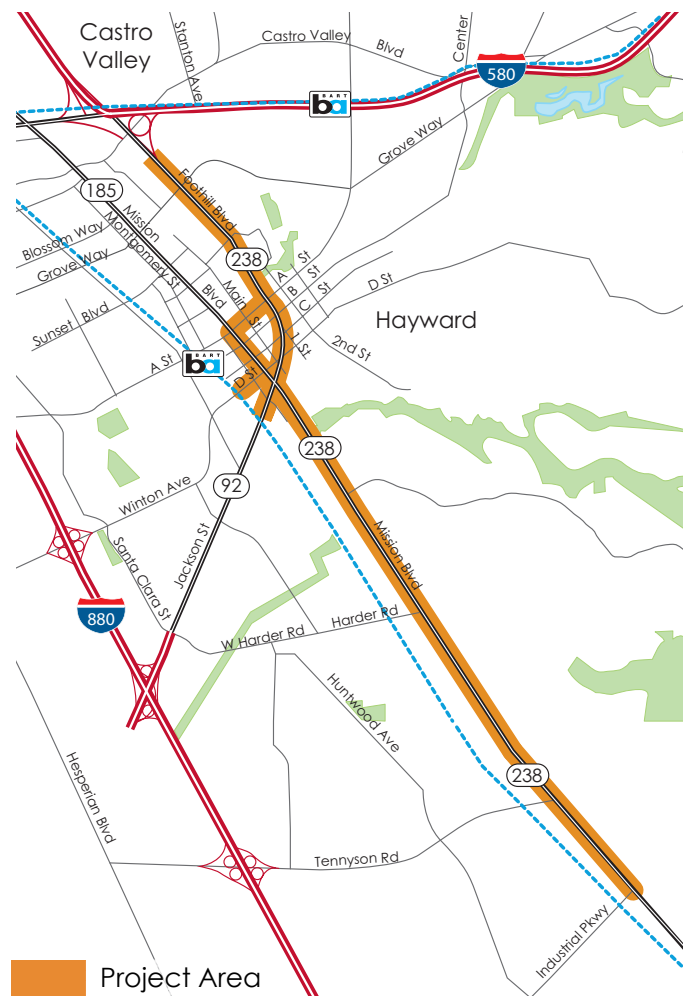

This project was designed to improve capacity, operations and pedestrian and bicycle access on Foothill and Mission Boulevards between the I-580 on-ramps and Industrial Parkway in the City of Hayward. Existing parking lanes on Foothill Boulevard were converted to through traffic lanes to accommodate three northbound and three southbound lanes in each direction for peak traffic periods as required and to moderate future traffic demand. Between A Street and Jackson Street, the project converted some existing two-way streets to a downtown one-way loop system. In addition, improvements were made to several intersections along the project corridor.

PROJECT STATUS

Construction and utility relocation activities began in August 2010 and were substantially completed in June 2013. In addition to traffic circulation improvements, the project included bicycle and pedestrian improvements, landscaping, new street lights and traffic signals and undergrounding of overhead utilities along the corridor. Closeout activities are underway.

Route 238 / Mission - Foothill - Jackson Corridor Improvements

Project Number: 506.0 | Complete

Project Highlights

- One way traffic circulation through downtown was implemented on March 15, 2013;
- The project is substantially complete with closeout activities underway
