Slide 3

## Adding new principal arterials to the CMP network

- Commission discussed two options in April
  - Option 1 – Re-evaluate the current 30,000 ADT threshold
  - Option 2 – Develop a two-tiered roadway network based on a set of qualitative criteria.
- The commission approved Option 2

Slide 4

## The approved Option 2

- These additional roadways identified under the approved option 2 will form a Tier 2 or supplemental CMP network
- They will be monitored for informational purposes only
- The criteria for adding roadways to the CMP network will be periodically reviewed and updated by the Commission.

Slide 5

## Option 2-Qualitative Criteria

- Major thoroughfares, whose primary function is to link districts within an Alameda County jurisdiction and to distribute traffic from and to the freeways
- Routes of county-wide significance with varying capacity that are not on the existing CMP network
- Streets that experience significant conflicts between auto traffic and transit service

### Policy on funding priority for the deficient CMP segments

- When a CMP roadway is declared deficient, funding for an appropriate portion if not the complete improvement - to implement one of the action plan components of the adopted deficiency plan - will be considered a priority for funding in the subsequent Countywide Transportation Plan and Congestion Management Plan CIP.

## ACTAC Discussion - Handout

- Tier 2 CMP Network
  - Tier 2 list updated based on many specific comments from ACTAC
- Funding priority
  - Based on comments guidelines for establishing priority will be developed and brought to the committees by end of this year

Slide 11

## Next Steps

- Upon approval by the Commission
  - Chapters 2-Designated Roadway System and 8 - Conformance, Monitoring and Deficiency Plans will be updated.
  - Data collection will begin on these roadways starting with the 2012 LOS Monitoring Study for biennial monitoring
