San Pablo Avenue Corridor Project

PROJECT OVERVIEW

San Pablo Avenue (State Route 123) is a critical inter-jurisdictional roadway that traverses four cities in Northern Alameda County (Oakland, Emeryville, Berkeley and Albany) and several Western Contra Costa County communities (El Cerrito, Richmond, San Pablo and unincorporated Contra Costa County). San Pablo Avenue is the heart of a critical travel corridor providing north-south connections throughout the inner East Bay paralleling I-80. San Pablo Avenue carries tens of thousands of people every day connecting multiple communities to job and activity centers. The corridor carries local, rapid and express buses and plays a key role as a reliever route for freeway traffic during incidents on I-80. The corridor also includes many high-activity pedestrian areas and is included as a bicycle route in many local jurisdiction plans. Jurisdictions are concentrating growth along the corridor, with several higher-density, mixed use developments recently completed and numerous others under consideration.

Improvements along San Pablo Avenue could include transit priority treatments such as queue jump lanes and signals to bypass congested segments and improve reliability, transit signal priority, signal modernization and coordination, and enhanced bus stops or stations. In addition, pedestrian safety improvements, such as pedestrian bulbs, crosswalk improvements, and curb ramps, as well as bicycle safety improvements and improved bicycle infrastructure will be evaluated. Short-, medium- and long term improvements will be identified, with priority on moving feasible projects towards implementation the near-term.

PROJECT BENEFITS

- Improves safety for all modes and reduces conflicts
- Accommodates growth by improving efficiency and reliability, and by carrying more people within the existing right-of-way
- Improves comfort and quality of trip for all users
- Supports local land use and economic development priorities
SAN PABLO AVENUE CORRIDOR PROJECT

PROJECT NEED

- To better serve existing users and accommodate growth from new housing and jobs, the corridor must be able to effectively carry more people through increased efficiency and improved travel choices.

- The corridor has limited right-of-way and competing demands, which must be brought together in a comprehensive, systematic way to advance “Complete Streets” concepts of safety, quality, and convenience for all users and all modes.

- Transit service in this corridor suffers delays and poor on-time performance due to moderate to severe traffic congestion on several key segments, which undermines the attractiveness of transit as a travel choice for many users.

- The corridor experiences high rates of collisions, affecting the safety of all users.

STATUS

Implementing Agency: Alameda CTC

Current Phase: Scoping

- Project Study Report - Project Development Support (PSR-PDS) anticipated fall 2019

PARTNERS AND STAKEHOLDERS

California Department of Transportation, Alameda CTC, Contra Costa Transportation Authority, Alameda-Contra Costa Costa Transit District, the cities of Albany, Berkeley, Emeryville, Oakland, El Cerrito, Richmond and San Pablo
