Report on Compliance for Measure B Program

Opinion on the Measure B Program

We have audited the San Francisco Bay Area Rapid Transit District's (the "District") compliance with the types of compliance requirements identified as subject to audit in the Alameda County 20-Year Transportation Expenditure Plan, issued by the Alameda County Transportation Commission ("Measure B Program") that could have a direct and material effect on the District's compliance with the Measure B Program for the year ended June 30, 2022.

In our opinion, the District complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on the Measure B Program for the year ended June 30, 2022.

Basis for Opinion on the Measure B Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States (Government Auditing Standards); and the audit requirements specified in the Measure B Program. Our responsibilities under those standards and the Measure B Program are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for the Measure B Program. Our audit does not provide a legal determination of the District's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules and provisions of contracts or grant agreements applicable to the District's Measure B Program.

(Continued)

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the District's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS, *Government Auditing Standards*, and the Measure B Program will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material, if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the District's compliance with the requirements of the Measure B Program as a whole.

In performing an audit in accordance with GAAS, *Government Auditing Standards*, and the Measure B Program, we

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the District's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of the District's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Measure B Program, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control Over Compliance

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of the Measure B program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of the Measure B program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of the Measure B program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

(Continued)

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Measure B Program. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Net Position, Schedule of Revenues, Expenses, and Changes in Net Position and Schedule Of Cash Flows

We have audited the financial statements of the business-type activities and fiduciary activities of the District as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the District's basic financial statements. We issued our report thereon dated November 21, 2022, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of net position, schedule of revenues, expenses, and changes in net position and schedule of cash flows are presented for purposes of additional analysis as required by the Measure B Program and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of net position, schedule of revenues, expenses, and changes in net position and schedule of cash flows are fairly stated in all material respects in relation to the basic financial statements as a whole.

SAN FRANCISCO BAY AREA RAPID TRANSIT DISTRICT
MEASURE B PROGRAM
NOTES TO SCHEDULES
For the year ended June 30, 2022

NOTE 1 - BASIS OF PRESENTATION

Under Measure B approved by the voters of Alameda County in November 2000, the San Francisco Bay Area Rapid Transit District (District) receives a share of the one-half percent sales tax to be used for local transportation-related expenses. The duration of the tax is 20 years from the initial year of collection, which began April 1, 2002 and expired on March 31, 2022.

The schedules are prepared from the accounts and financial transactions of the District for the Alameda County Transportation Commission for the Measure B Program. The accounts are used to accounts for the District's share of revenues earned and expenses incurred under the District's Measure B-funded paratransit operations.

The schedules do not purport to, and do not, present fairly the financial position of the District as of June 30, 2022, the changes in its financial position, or where applicable, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America. The activities of the Measure B Program are reported within the District's enterprise fund. The projects funded by Measure B represent a portion of the activities of the District and, as such, are included in the District's financial statements.
