Changes to Parking and Loading

New bike facilities and pedestrian crossing enhancements are proposed in your area to improve safety. As part of these changes, parking will be removed at driveways to improve visibility and bus stops will be lengthened to provide more space for buses to stop and passenger waiting, resulting in reduction in parking. All passenger loading zones, commercial loading zones, and accessible parking will be replaced but locations may shift.

Driveway Daylighting

Changes To Circulation

In order to improve overall safety, some left turns from E. 12th St. will be restricted. Motorists will be able to access adjacent neighborhoods by making U-turns at a nearby intersection and then making a right turn.
