- January 2023**
 Advertisement for the solicitation of contractor bid proposals begins
- July 2023**
 Construction on the 7th Street Grade Separation East Project begins
- 2023-2026**
 Estimated construction duration

What is GoPort?

[Global Opportunities at the Port of Oakland \(GoPort\)](#) is a series of transportation improvements at the Port of Oakland. The 7th Street Grade Separation East (7SGSE) project proposes to realign and reconstruct the existing substandard railroad underpass on 7th Street between Interstate 880 and Maritime Street, to improve truck and car access to the Port of Oakland as well as meet current geometric and seismic standards. A new pedestrian and bicycle pathway will provide improved community access. The existing 7th Street and Frontage Road thoroughway to the Port of Oakland is expected to remain open during construction.

Existing roadway and multi-use pathway

Proposed roadway and multi-use pathway (conceptual landscaping subject to input)

Community Outreach, Engagement and Feedback

Community outreach began in 2019, continues today, and will continue during construction. Alameda CTC, Port of Oakland and City of Oakland staff have made presentations, provided updates and answered questions from multiple neighborhood groups, business associations and community-based organizations.
