

San Pablo Avenue Corridor Parallel Bike Improvements

SPRING 2026

Project Overview

The San Pablo Avenue Parallel Bike Improvements project proposes to construct improvements to neighborhood street bicycle routes parallel and connecting to San Pablo Avenue within North Oakland, Berkeley and Albany. The project would extend along various streets within the three cities, including Kains and Adams streets, Ninth Street, Mabel Street and others. The project scope also includes crossing upgrades at major street crossings, traffic calming, such as diverters and traffic circles, and improved wayfinding. The project was identified based on the first phase of San Pablo Avenue corridor planning and outreach from 2017-2020. It is now part of a package of three discrete projects being advanced along San Pablo Avenue within Alameda County.

Aerial map of project location. (For illustrative purposes only.)

Project Need

- San Pablo Avenue is identified as a high injury route with the third highest number of collisions in Alameda County.
- Within Berkeley and Albany, San Pablo Avenue lacks bicycle facilities, but the corridor has a strong network of parallel neighborhood streets. While many of these streets are existing bicycle boulevards, prior community outreach identified the need for improvements to make them feel safe and comfortable for people of all ages and ability levels.
- San Pablo Avenue is identified as an Equity Priority Community and a Priority Development Area, which is planned for growth and increased density. Improved multimodal options are needed to accommodate growth and better serve residents that may rely on alternatives to driving.

Project Benefits

- Improved safety and comfort for bicyclists
- Improved neighborhood livability from traffic calming improvements
- Environmental sustainability and equity benefits from improving non-driving options

SAN PABLO AVENUE CORRIDOR PARALLEL BIKE IMPROVEMENTS

Existing bike boulevard route showing roundabout and crossing treatment.

Bike Boulevard in the cities of Berkeley/Albany.

Example diverter treatment.

Status

The project is currently in the final design phase.

Partners and Stakeholders

Cities of Berkeley, Albany, and Oakland

Fact sheet periodically updated.

COST ESTIMATE BY PHASE (\$ X 1,000)

PE/Environmental	\$681
Final Design	\$2,136
Right-of-Way	\$250
Construction	\$15,600
Total Expenditures	\$18,851

FUNDING SOURCES (\$ X 1,000)

Local – Measure BB	\$6,253
Federal (OBAG) ¹	\$12,597
Total Expenditures	\$18,851

¹One Bay Area Grant 3.

SCHEDULE BY PHASE

	Begin	End
Planning/Scoping	2017	Summer 2022
Environmental/Design	Fall 2022	Spring 2026
Construction Bidding	Summer 2026	Winter 2026
Construction	Spring 2027	Summer 2028

Note: Public outreach occurs at each phase of the project.
